SUBJECT INDEX

Page

Acid phosphatase, distribution in tumors, normal tissues, and tissues of tumor-bearing rats and mice 511
Adenocarcinoma—
induction in pyloric stomach in mice .. 193
transplanted, enzymatic activity of .. 631
Alkaline phosphatase, distribution in tumors, normal tissues, and tissues of tumor-bearing rats and mice 511
p-Aminodimethylaniline, effect of oral administration on growth of rat 531
Amylase, relative activity in normal and cancerous hepatic tissues of the rat 17
Anaphylaxis in transplanted tumors 625
Aniline, effect of oral administration on growth of rat 531
Apparatus for milking mice 457
Bakelite disks subcutaneously planted, sarcomas at sites 81
3,4-Benzpyrene, effect of application to vagina and cervix of mice 361
Butter yellow. *See* *p*-Dimethylaminoazobenzene.
Cancer—
gastric—
observations on 583
problem of 85
human, research on biology of 133
research 309
Carbon tetrachloride, induction of hepatomas in mice 197
Carcinogenesis—
early stages by 20-methylcholanthrene—
I. Experimental technique and macroscopic changes 369
II. Microscopic tissue changes ... 379
epidermal, mitotic frequency in methylcholanthrene-induced 335
penetration of ultraviolet radiation into skin as a factor 403
studies—
XV. Compounds related to 20-methylcholanthrene 99
XVI. Production of subcutaneous tumors in mice by miscellaneous polycyclic compounds 241

Page

Carcinogenesis—Continued.
studies—Continued.
XVII. Local effect of repeated application of 3,4-benzpyrene and human smegma to vagina and cervix of mice 361
Carcinogenic hydrocarbons, factors influencing pulmonary tumor induction in mice 499
Carcinogens, effect on small organisms. III. Cell-division rate and population levels of methylcholanthrene-adapted paramecia 185
Carcinoma, spontaneous mammary, effect of pantothenic acid on growth 47
Catalase activity—
blood, of tumor-bearing animals 589
kidney, of tumor-bearing animals 589
liver, of tumor-bearing mice 345
relative, in normal and cancerous hepatic tissues 17
Cholesterol pellets. *See* methylcholanthrene-cholesterol pellets; also stilbestrol-cholesterol pellets.
Cystine—
dietary—
effect on development of hepatic tumors in rats fed *p*-demethylaminoazobenzene 535
effect on reaction of dilute brown mice to methylcholanthrene 95
effect on growth of mice of diet low in .. 449
Dermis, methods of separation from epidermis 413
Desoxycorticosterone, lack of carcinogenic potency of 61
3, 4, 5, 6-Dibenzcarbazole, hepatic changes and tumor induction in rats by subcutaneous injection of 139
p-Dimethylaminoazobenzene—
effect of dietary cystine in development of hepatic tumors in rats fed 535
pathologic changes, pigmentation and classification of hepatic tumors in rats fed 157

Page

Epidermis, methods of separation from dermis, physiologic and chemical properties . . . 413
Estradiol benzoate, influence on epidermal methylcholanthrene carcinogenesis . . . 577
Foster nursing, effect on induction of mammary and testicular tumors in mice injected with stilbestrol . . . 611
Gastric lesion, adenomatous, intrapulmonary transplantation . . . 151
Gastric lesions, production in rats by fasting, partial inanition, and deficiency of dietary constituents . . . 459
Gastritis, atrophic . . . 583
Genes, susceptibility to induced pulmonary tumors, relationship . . . 127
Golgi apparatus of induced and spontaneous hepatomas in the mouse . . . 565
Hemangioendothelioma, transplantable, malignant, of liver in mouse . . . 479
Hemorrhage in transplanted tumors . . . 625
Hepatoma—
  rat, comparative proteinase and peptidase activities . . . 277
  transplantable spontaneous in C3H mouse . . . 555
Hepatomas—
  mitochondria and Golgi apparatus of induced and spontaneous . . . 565
  induction with carbon tetrachloride . . . 197
Hybridization, influence on natural resistance of mice to progressive growth of sarcoma 37 . . . 1
Hypervitaminosis D, absence in mice subjected to ultraviolet radiation . . . 623
Leukoses, induced and spontaneous, identification of cells . . . 115
Liver catalase activity—
  of tumor-bearing rats . . . 283
  titration of in normal and tumor-bearing rats and mice . . . 525
Mammary tumor inciter (MTI), extraction and ultracentrifugation . . . 451
Methylcholanthrene—
  carcinogenesis—
    early stages—
      I. Experimental technique and macroscopic changes . . . 369
      II. Microscopic tissue changes . . . 379
    epidermal—
      influence of estradiol benzoate . . . 577
      mitotic frequency . . . 335

Page

  cell-division rate and population of paramecia adapted to . . . 185
  -cholesterol pellets, production of tumors in mice after removal . . . 333
  compounds related to . . . 99
  disappearance in mice injected intravenously . . . 491
  effect of dietary cystine on reaction of mice to . . . 95
  induction of adenocarcinoma in pyloric stomach in mice . . . 193
Milk—
  effect of ingestion in production of mammary tumors . . . 13
  influence, transfer from strain C3H through successive generations of strain C mice . . . 307
  See also mammary tumor inciter (MTI).
Mitochondria of induced and spontaneous hepatomas in the mouse . . . 565
Myelomas, spontaneous regression, metastatic growths . . . 123
Nucleoprotein fraction, composition, in normal rat liver and in transplanted hepatic tumor in the rat . . . 305
Pantothenic acid—
  effect on growth and maintenance of life in C3H mice . . . 29
  effect on growth of spontaneous mammary carcinoma in female C3H mice . . . 47
  morphologic changes associated with deficiency of . . . 39
Peptidase activities of rat hepatoma and normal and regenerating rat liver . . . 277
Proteinase activities of rat hepatoma and normal and regenerating rat liver . . . 277
Rat hepatoma 31, pathology . . . 539
Rat liver, normal and regenerating, comparative proteinase and peptidase activities . . . 277
Riboflavin—
  content of tumor tissues . . . 595
  pathologic changes associated with deficiency of . . . 601
Ribonuclease . . . 301
Sarcoma 37, influence of hybridization on natural resistance of mice to progressive growth of . . . 1
Sarcomas, at site of subcutaneously implanted bakelite disks . . . 81
Smegma, human, effect of application to vagina and cervix of mice . . . 361

	Page
Sodium thymonucleate, effect of ultraviolet radiation	23
Stilbestrol—	
effect of foster nursing on tumor induction in mice injected with	611
-cholesterol pellets, induction of testicular tumors in mice and other effects	65
toxic and carcinogenic effects in mice	55
Sulfur-containing compounds, effect on initiation of mitosis in *Amoeba proteus*	425
Thymonucleodepolymerase	301
method of evaluating activity in normal and tumor tissues	357
Tissues—	
cancerous hepatic, relative activity of xanthine dehydrogenase, catalase, and amylase	17
normal hepatic, relative activity of xanthine dehydrogenase, catalase, and amylase	17
thymonucleodepolymerase activity in normal and tumor	357
tumor, riboflavin content	595
Tumor—	
immunity	317
inciter, mammary, extraction and ultracentrifugation	451
Tumors—	
chicken, metabolism	201
effect of extirpation	283
effect of spontaneous regression and removal	345
hepatic—	
classification	157
effect of dietary cystine on development	535
pigmentation of, in rats fed *p*-dimethylaminoazobenzene	157
induced pulmonary, relation between susceptibility and known genes	127
Tumors—Continued.	Page
mammary—	
effect of nursing on induction of	611
effect of ingestion of milk in production of	13
of external ear in mice induced by ultraviolet radiation	269
production in mice after removal of methylcholanthrene-cholesterol pellets	333
pulmonary—	
disappearance of methylcholanthrene in mice of different susceptibility	491
induction by carcinogenic hydrocarbons	499
induction by 3,4,5,6,-dibenzcarbazole	139
quantitative induction of, with ultraviolet radiation	259
relative enzymatic activity of, and normal control tissues	293
spontaneous, influence of paternal parent in determining susceptibility of mice to	7
subcutaneous, induced by 3,4,5,6-dibenzcarbazole	139
testicular—	
effect of foster nursing on induction	611
induction, other effects of stilbestrol-cholesterol pellets in mice	65
transplanted, anaphylaxis and hemorrhage in	625
Ultraviolet radiation—	
absence of hypervitaminosis D in mice subjected to	623
effect on sodium thymonucleate	23
induction of tumors of external ear in mice	269
penetration into skin	403
quantitative induction of tumors with	259
Xanthine dehydrogenase	17
